UAE Residence Visa

PROFESSIONAL SUMMARY

Senior DevOps/Platform Engineer with 7+ years building secure, highly available AWS and Kubernetes platforms for fintech and regulated enterprise environments. Track record migrating production workloads to EKS, automating infrastructure with Terraform, and embedding security and compliance controls (SOC 2, PCI, ISO 27001) directly into CI/CD pipelines. Independently designs, builds, and ships production-quality open-source DevOps tooling, published and documented on GitHub.

TECHNICAL SKILLS

Cloud: AWS, Azure, GCP

IaC: Terraform, CloudFormation, Ansible

CI/CD & GitOps: GitHub Actions, Jenkins, Argo CD, Helm, Kustomize

Containers & Orchestration: Docker, Kubernetes (EKS, ECS, AKS)

Security & Compliance: HashiCorp Vault, GuardDuty, Wazuh (SIEM/XDR), Trivy, Snyk, SonarQube, Checkov, DAST/SAST/SCA, SOC 2, ISO 27001, CBUAE Audit

Monitoring & Logging: Prometheus, Grafana, Alloy, Loki, OpenTelemetry, Fluent Bit, New Relic, Zabbix

Scripting & Automation: Bash, Python

Databases: PostgreSQL, MySQL, MSSQL, DynamoDB

Version Control: GitHub, Bitbucket, GitLab

PROFESSIONAL EXPERIENCE

DevOps Engineer - Pay10 UAE

Oct 2025 – Present

Dubai, UAE

- Architected a multi-environment AWS/Azure platform on Amazon EKS with Terraform, Helm, and ArgoCD supporting 30+ microservices across Production, UAT, and Pre-Production, sustaining 99.9% service availability.
- Led the migration of 30+ applications from Amazon ECS to Amazon EKS, standardizing deployments on Helm charts and ArgoCD ApplicationSets, cutting deployment effort by 60% and removing environment configuration drift.
- Automated infrastructure provisioning (networking, compute, IAM, storage, Kubernetes) with Terraform, eliminating manual deployment steps and cutting provisioning time by 70%.
- Built centralized observability with Grafana, Prometheus, Loki, and CloudWatch, cutting mean incident triage time by 40% through proactive alerting and dashboards.
- Cut monthly cloud spend 20–25% via EC2 rightsizing, Karpenter/HPA/VPA autoscaling, and EBS/EFS optimization, with no impact to application performance or SLAs.

Senior DevOps Engineer - Alamy

Nov 2023 – Oct 2025

Trivandrum, India

- Owned the Kubernetes platform underpinning 50+ microservices across multiple environments, improving release consistency and workload scalability for the engineering org.
- Led architecture design reviews and owned key platform design decisions; mentored and onboarded junior and mid-level engineers, and led on-call rotation and incident response for production systems.
- Reduced critical infrastructure security findings by 90% by embedding automated vulnerability scanning and policy validation directly into delivery pipelines.
- Designed highly available hybrid cloud networking (AWS VPC, Direct Connect, Site-to-Site VPN, NAT Gateway) to secure connectivity between enterprise and cloud environments.
- Implemented enterprise IAM, RBAC, and SSO using AWS IAM and Azure AD (Entra ID), strengthening least-privilege access governance across the platform.
- Migrated legacy application and search workloads to cloud-native containers, improving operational resilience and system performance.

Senior Platform Engineer - Quantiphi

Aug 2021 – Nov 2023

Trivandrum, India

- Delivered multi-cloud infrastructure across AWS, Azure, and GCP using Terraform, standardizing repeatable deployments for enterprise clients.
- Contributed to architecture and design reviews for multi-cloud deployments; mentored and onboarded new engineers, and participated in on-call rotation and incident response.
- Operated Amazon EKS, Amazon ECS, and Azure Kubernetes Service (AKS) with rolling and blue-green deployment strategies for high-availability production workloads.
- Built CI/CD pipelines with Jenkins, Git, Docker, and Kubernetes, cutting release cycles by 25% while improving deployment consistency.
- Implemented centralized monitoring, logging, and secrets management, improving platform visibility and operational efficiency.

Site Reliability Engineer (SRE) - Armia Systems

Jun 2020 – Aug 2021

Ernakulam, India

- Automated Linux infrastructure provisioning, patch management, and configuration management, improving operational consistency across the fleet.
- Designed monitoring and alerting for 100+ production servers, supporting SLA/SLO objectives and improving infrastructure availability.
- Led capacity planning and incident troubleshooting, reducing service disruptions and improving production stability.

TechOps Engineer - Activelobby IS

Oct 2018 – Feb 2020

Ernakulam, India

- Administered Linux and Windows production and staging servers, including backup management and infrastructure maintenance.
- Automated operational tasks via shell scripting, reducing manual effort and supporting a 5-member technical operations team.

SELECTED OPEN-SOURCE & AUTOMATION PROJECTS

- **aws-patch** — Linux patch automation tool for AWS EC2 fleets across multiple distros, with full CI/CD pipeline, test coverage, and documentation. yousafkhamza.github.io/aws-patch
- **pxtrim** — Client-side image resize, compress, and convert tool built with Vite + vanilla JS, deployed to GitHub Pages. yousafkhamza.github.io/pxtrim
- **universal-app-chart** — Reusable Helm chart for standardized Kubernetes application deployments, with an automated GitHub Actions release workflow. yousafkhamza.github.io/universal-app-chart

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)
- AWS Certified Solutions Architect – Associate
- HashiCorp Certified: Terraform Associate
- Generative AI Foundations Certificate — upGrad (in collaboration with Microsoft)

EDUCATION

- MSc Computer Science — Bharathiar University, India (2021 – 2023)
- BTech Computer Science — North East Frontier Technical University, India (2014 – 2018)
