PROFESSIONAL SUMMARY

Senior DevOps & Platform Engineer with 8+ years leading secure, highly available AWS and Kubernetes platforms for fintech and regulated enterprise environments. Track record of owning production infrastructure end-to-end: architecting EKS migrations, automating provisioning with Terraform, and embedding security and compliance (SOC 2, PCI, ISO 27001) into CI/CD pipelines. Frequently the primary engineer for production platforms and security tooling, partnering with leadership on architecture decisions, incident response, and audit readiness.

TECHNICAL SKILLS

- Cloud & Networking: AWS, Azure, GCP, AWS VPC, Direct Connect, Site-to-Site VPN, NAT Gateway
- IaC: Terraform, CloudFormation, Ansible
- CI/CD & GitOps: GitHub Actions, Jenkins, Argo CD, Helm, Kustomize
- Containers & Orchestration: Docker, Kubernetes (EKS, ECS, AKS), Karpenter, HPA/VPA, EC2 Rightsizing
- AI/ML & Data: AWS SageMaker, Amazon Kinesis, LLM/GenAI Integration, MLOps
- Security & Compliance: HashiCorp Vault, GuardDuty, Wazuh (SIEM/XDR), Trivy, Snyk, SonarQube, Checkov, DAST/SAST/SCA, k6, SOC 2, ISO 27001, CBUAE Audit, PAM/JumpServer
- Monitoring & Logging: Prometheus, Grafana, Loki, OpenTelemetry, Fluent Bit, CloudWatch, New Relic, Zabbix
- Scripting & Automation: Bash, Python
- Databases: PostgreSQL, MySQL, MSSQL, MongoDB, DynamoDB
- Version Control: GitHub, Bitbucket, GitLab

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer - Pay10 UAE

Oct 2025 - Present

Dubai, UAE

- Serve as primary DevOps engineer for production Kubernetes and AWS platforms supporting 30+ microservices across Production, UAT, and Pre-Production, using Amazon EKS, Terraform, Helm, and ArgoCD, sustaining 99.9% availability.
- Spearheaded the migration of 30+ applications from Amazon ECS to Amazon EKS, standardizing deployments on Helm charts and ApplicationSets, cutting deployment effort by 60% and eliminating environment drift.
- Automated end-to-end infrastructure provisioning (networking, compute, IAM, storage, Kubernetes) with Terraform, cutting provisioning time by 70% and eliminating manual deployment steps.
- Architected and deployed a fleet-wide Privileged Access Management solution (JumpServer CE) across 35 production servers (Linux and Windows) with vaulted service accounts, session recording, and audit controls aligned to PCI DSS and SOC 2.
- Designed and implemented an Azure-based disaster recovery strategy for critical workloads, including geo-redundant backups and failover automation aligned to RTO/RPO and compliance targets.
- Engineered an internal API security and load-testing platform, combining active endpoint discovery, baseline calibration, and automated k6 load-test generation to surface exposures before release.
- Established centralized observability with Grafana, Prometheus, Loki, and CloudWatch, including a custom API Gateway access-log dashboard, cutting mean incident triage time by 40%.
- Slashed monthly cloud spend by 20-25% via EC2 rightsizing, Karpenter/HPA/VPA autoscaling, and EBS/EFS optimization, with zero impact to application performance or SLAs.

Senior DevOps Engineer - Alamy

Nov 2023 - Oct 2025

Trivandrum, India

- Owned the Kubernetes platform underpinning 50+ microservices across multiple environments, improving release consistency and workload scalability for the engineering org.
- Directed architecture design reviews, mentored and onboarded junior and mid-level engineers, and ran the on-call rotation and incident response process for production systems.
- Cut critical infrastructure security findings by 90% by embedding automated vulnerability scanning and policy validation directly into delivery pipelines.

- Built highly available hybrid cloud networking (AWS VPC, Direct Connect, Site-to-Site VPN, NAT Gateway) to secure connectivity between enterprise and cloud environments.
- Implemented enterprise IAM, RBAC, and SSO using AWS IAM and Azure AD (Entra ID), strengthening least-privilege access governance across SaaS internal and cloud platforms.
- Migrated legacy application and search workloads to cloud-native containers, improving operational resilience and system performance.
- Integrated an LLM-based AI tool into the CI/CD pipeline to automate code review and surface issues pre-merge, improving code quality and reducing manual review effort.

Senior Platform Engineer - Quantiphi

Aug 2021 - Nov 2023

Trivandrum, India

- Delivered multi-cloud infrastructure across AWS, Azure, and GCP using Terraform, standardizing repeatable deployments for enterprise clients.
- Contributed to architecture and design reviews for multi-cloud deployments, mentored new engineers, and supported on-call rotation and incident response for enterprise clients.
- Operated Amazon EKS, Amazon ECS, and Azure Kubernetes Service (AKS) with rolling and blue-green deployment strategies for high-availability production workloads.
- Streamlined CI/CD pipelines with Jenkins, Git, Docker, and Kubernetes, cutting release cycles by 25% while improving deployment consistency.
- Strengthened platform visibility and operational efficiency by implementing centralized monitoring, logging, and secrets management.
- Provisioned and managed AWS SageMaker and Kinesis infrastructure supporting ML model training and real-time data streaming pipelines for enterprise ML/analytics workloads.

Site Reliability Engineer (SRE) - Armia Systems

Jun 2020 - Aug 2021

Ernakulam, India

- Modernized Linux infrastructure provisioning, patch management, and configuration management, improving operational consistency across the fleet.
- Deployed monitoring and alerting for 100+ production servers, supporting SLA/SLO objectives and improving infrastructure availability.
- Drove capacity planning and incident troubleshooting, reducing service disruptions and improving production stability.

TechOps Engineer - Activelobby IS

Oct 2018 - Feb 2020

Ernakulam, India

- Administered Linux and Windows production and staging servers, including backup management and infrastructure maintenance.
- Simplified operational tasks via shell scripting, reducing manual effort and supporting a 5-member technical operations team.

OPEN-SOURCE PROJECTS & RECENT ACHIEVEMENTS

- IAM Policy Visualizer - Client-side AWS IAM policy analysis and visualization tool for spotting over-privileged access, no backend required. (yousafkhamza.github.io/iam-visualizer)
- PodGauge - Kubernetes resource sizing and rightsizing tool for optimizing CPU/memory requests and limits across workloads. (yousafkhamza.github.io/podgauge)
- Universal Helm Chart - Reusable Helm chart for standardized Kubernetes application deployments across environments. (yousafkhamza.github.io/universal-app-chart)

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)
- AWS Certified Solutions Architect - Associate
- HashiCorp Certified: Terraform Associate
- Generative AI Foundations Certificate - upGrad (in collaboration with Microsoft)

EDUCATION

- MSc Computer Science - Bharathiar University, India (2021 - 2023)
- BTech Computer Science - North East Frontier Technical University, India (2014 - 2018)
