PROFESSIONAL SUMMARY

Senior DevOps & Platform Engineer with 8+ years leading secure, highly available AWS and Kubernetes platforms for fintech and regulated enterprise environments. Track record of owning production infrastructure end-to-end: architecting EKS migrations, automating provisioning with Terraform, and embedding security and compliance (SOC 2, PCI, ISO 27001) into CI/CD pipelines. Frequently the primary engineer for production platforms and security tooling, partnering with leadership on architecture decisions, incident response, and audit readiness.

TECHNICAL SKILLS

- Cloud: AWS, Azure, GCP
- IaC (Infrastructure as Code): Terraform, CloudFormation, Ansible
- CI/CD & GitOps: GitHub Actions, Jenkins, Argo CD, Helm, Kustomize
- Containers & Orchestration: Docker, Kubernetes (EKS, ECS, AKS), Karpenter, HPA/VPA,
- AI/ML & Data: AWS SageMaker, Amazon Kinesis, LLM/GenAI Integration, MLOps
- Security & Compliance: HashiCorp Vault, GuardDuty, Wazuh (SIEM/XDR), Trivy, Snyk, SonarQube, Checkov, DAST/SAST/SCA, k6, SOC 2, ISO 27001, CBUAE Audit, PAM/JumpServer
- Monitoring & Logging: Prometheus, Grafana, Loki, OpenTelemetry, Fluent Bit, CloudWatch, New Relic
- Scripting & Automation: Bash, Python
- Databases: PostgreSQL, MySQL, MSSQL, MongoDB, DynamoDB
- Version Control: GitHub, Bitbucket, GitLab

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer | Pay10 UAE, Dubai, UAE

Oct 2025 – Present

- Lead DevOps for production AWS and Kubernetes platforms supporting 30+ microservices across Production, UAT, and Pre-Production using Amazon EKS, Terraform, Helm, and Argo CD, maintaining 99.9% availability.
- Led migration of 30+ applications from Amazon ECS to Amazon EKS, standardizing Kubernetes deployments with Helm charts, reducing deployment effort by 60% and eliminating environment drift.
- Automated end-to-end AWS infrastructure provisioning across networking, compute, IAM, storage, and Kubernetes using Terraform, reducing provisioning time by 70% and removing manual steps.
- Architected and deployed Privileged Access Management with JumpServer CE across 35 production Linux and Windows servers, using vaulted accounts, session recording, and audit controls aligned with PCI DSS and SOC 2.
- Designed and implemented Azure cloud disaster recovery for critical workloads, including geo-redundant backups and automated failover aligned with RTO/RPO and compliance requirements.
- Engineered an API security and load-testing platform with endpoint discovery, baseline calibration, and automated k6 test generation to identify security exposures before release.
- Established centralized observability using Grafana, Prometheus, Loki, and CloudWatch, including an API Gateway access-log dashboard, reducing mean incident triage time by 40%.
- Reduced monthly AWS cloud spend by 20-25% through EC2 rightsizing, Karpenter, HPA/VPA autoscaling, and EBS/EFS optimization, with no impact on application performance or SLAs.

- Senior DevOps Engineer | Alamy, Trivandrum, India,** Nov 2023 – Oct 2025
- Owned the Kubernetes platform supporting 50+ microservices across multiple environments, improving deployment consistency, scalability, and platform reliability for engineering teams.
 - Reduced critical infrastructure security findings by 90% by integrating automated vulnerability scanning and policy validation into CI/CD pipelines.
 - Built highly available hybrid cloud networking using AWS VPC, Direct Connect, Site-to-Site VPN, and NAT Gateway to secure enterprise-to-cloud connectivity.
 - Implemented enterprise IAM, RBAC, and SSO using AWS IAM and Azure AD (Entra ID), strengthening least-privilege access across cloud and SaaS platforms.
 - Integrated an LLM-based AI code review tool into CI/CD to automate pre-merge analysis, identify defects earlier, and reduce manual code review effort.
- Senior Platform Engineer (SRE) | Quantiphi, Trivandrum, India,** Aug 2021 – Nov 2023
- Delivered multi-cloud infrastructure across AWS, Azure, and GCP using Terraform, standardizing repeatable infrastructure deployments for enterprise clients.
 - Contributed to multi-cloud architecture and design reviews, mentored engineers, and supported on-call operations and incident response for enterprise clients.
 - Optimized CI/CD pipelines using Jenkins, Git, Docker, and Kubernetes, reducing release cycles by 25% while improving deployment consistency.
 - Provisioned and managed AWS SageMaker and Kinesis infrastructure, Apache Kafka for ML model training and real-time data streaming workloads across enterprise analytics environments.
- Site Reliability Engineer | Armia Systems, Ernakulam, India,** June 2020 - Aug 2021
- Modernized Linux infrastructure provisioning, patch management, and configuration management, improving operational consistency and reliability across production environments.
 - Implemented monitoring and alerting for 100+ production servers, supporting SLA/SLO objectives and improving infrastructure availability and incident response.
 - Performed capacity planning and production incident troubleshooting, reducing service disruptions and improving system reliability and operational stability.
- TechOps Engineer | Activelobby IS, Ernakulam, India,** Oct 2018 – Feb 2020
- Administered Linux and Windows production and staging servers, managing backups, patching, monitoring, and infrastructure maintenance.
 - Automated operational tasks with shell scripting, reducing manual effort and improving infrastructure support efficiency across a 5-member technical operations team.

SELECTED OPEN SOURCE & AUTOMATION PROJECTS

- IAM Policy Visualizer - Client-side AWS IAM policy analysis and visualization tool for spotting over-privileged access, no backend required. (yousafkhamza.github.io/iam-visualizer)
- PodGauge - Kubernetes resource sizing and rightsizing tool for optimizing CPU/memory requests and limits across workloads. (yousafkhamza.github.io/podgauge)
- Universal Helm Chart - Reusable Helm chart for standardized Kubernetes application deployments across environments. (yousafkhamza.github.io/universal-app-chart)

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)
- AWS Certified Solutions Architect - Associate
- HashiCorp Certified: Terraform Associate
- Generative AI Foundations Certificate - upGrad (in collaboration with Microsoft)

EDUCATION

- MSc Computer Science (2021 - 2023), Bharathiar University, India.
- BTech Computer Science (2014 - 2018), North East Frontier Technical University, India.
